To: Shiyong Xiong <Shiyong.Xiong@dartmouth.edu>

Dear Colleagues,

Today I have found your very interesting paper entitled "Construction and evolution of knotted vortex tubes in incompressible Schrödinger flow". Your findings are very important for incompressible fluids.

From my side, I send you two of my papers (with Victor Ruban, and another with Vladimir Zakharov) which I hope will be interesting for you in your studies.

Thanks and best wishes,

Evgeny Kuznetsov
